

Effortless and hassle-free learning

MicroLearning helps users to memorize information and increase their knowledge.

Have you wanted to learn a language for a long time?
Do you need to memorize many new technical terms quickly?
Do you want to take a career-promoting exam - but you either can't seem to find the time to learn or you don't have the course material on hand when you need it?

All this could change! KnowledgePulse® is your personal learning coach, guiding you throughout the day. You can learn whenever you have time.

Achieve the learning success you seek!

Lasting and measurable learning success

KnowledgePulse® allows you to take small learning steps in passing, without additional effort, on your PC, notebook or mobile phone. The learning subject is split into small learning units and learning steps are offered whenever your device has been idle for a time. When you want to resume learning after making a phone call, for example, KnowledgePulse® will offer you a preset number of learning steps. When waiting at a bus stop, the next learning step will appear when you open your SmartPhone.

Lasting learning is more fun

Eliminate your frustration at having no time to learn. Free of any academic drill, KnowledgePulse® lets you learn easily and effortlessly in small learning steps. Consistency will help you to attain success and have fun again. There is no need to look for course materials or carry scripts or books, no peer pressure in seminars. KnowledgePulse® adapts to your individual learning speed - until you really do know everything.

KnowledgePulse® USP:

- easy learning
- easy authoring
- no administrative effort

Your invisible personal coach

KnowledgePulse® ensures that the right steps are learned and repeated if necessary until you attain success. The application provides you with learning opportunities and suggests short learning sequences, sending unobtrusive micro-impulses to your device. Your personal learning progress is updated continuously and subsequent learning steps are adapted on-the-fly.

Knowledge instead of awareness

Whether you are learning for certification exams, vocational training, language lessons or product specification updates: without repetition, acquired knowledge is quickly lost. Only lasting learning ensures success. With KnowledgePulse®, you can consolidate your knowledge and secure it for the long term - on your PC, notebook or mobile phone, at work and at home.
